

# Extended Discharge capability for the Superseder XG and the SuperMasterCharger

The discharge capability of the Superseder XG/SuperMasterCharger, is standard at 60A max for one battery and 30A max for two batteries, but it can be extended by way of a factory installed external module. With this upgrade, the new capability is increased to 80A max for one battery and 40A max for two batteries.

Order the Superseder XG EXD with P/N 9899603018 and the SuperMasterCharger EXD with P/N 9899603008.
